

Victor Muhoro

Software Developer

+254 792466821 | email@gmail.com | [linkedin](#) | [github](#) | [portfolio](#)

SUMMARY

Full Stack Developer with hands-on experience in building full-stack web applications using modern technologies. Currently pursuing an Information Technology degree at KCA University and a graduate of Moringa School's Software Engineering program. Skilled in Laravel, Node.js, React, MySQL, Git, and building responsive UI/UX. Passionate about scalable solutions, clean code, and learning from real-world challenges.

SKILLS

- Languages & Frameworks: JavaScript, Node.js, Laravel, Angular.js, React
- Backend: Express.js, REST APIs, Firebase, MySQL, MongoDB
- Tools: GitHub, Docker, CI/CD (basic), Postman
- Cloud & DevOps: AWS (basic), GCP (familiar), Git, Testing (Jest)

Projects

Tomato – Full-Stack Hotel Web Application

[\[Github\]](#) / [Live Link](#)

- Developed a fully functional hotel booking platform using **React**, **Node.js**, **Express**, and **MongoDB**.
- Implemented user authentication, booking management, and payment integration.
- Designed a responsive UI for both customers and hotel admins.
- Followed Agile principles with sprint planning and version control via Git.

CryptoTracker – Cryptocurrency Price Tracker

[\[Github\]](#) / [Live Link](#)

- Created a cryptocurrency tracker that uses the **CoinGecko API** to display real-time prices and market data.
- Built with **React**, **Axios**, and **Chart.js** to visualize price trends.
- Integrated filtering, search, and detailed coin view for enhanced user interaction.
- Deployed the app and optimized it for mobile responsiveness.

EXPERIENCE

IPsCCWatch (NGO) Freelance Web Developer

Nairobi, Kenya | May 2025 – June 2025

www.ipsc.watch.org

- Designed and developed the official website for Indigenous Peoples Climate Change Watch using WordPress.
- Ensured accessibility, responsiveness, and SEO optimization.

- Collaborated with NGO stakeholders to meet content and branding needs.

Junior Developer | CodSoft (Internship)

Remote | June 2023 – September 2023

- Participated in Agile development of client web applications using modern web stacks.
- Helped plan sprints and coordinated stand-ups using Jira.
- Conducted bug fixing, feature implementation, and performance testing.
- Collaborated with designers and backend teams to ensure project alignment.

EDUCATION

KCA University — *Bachelor of Science in Information Technology*

Nairobi, Kenya | Expected Graduation: July 2025

- Relevant Coursework: Software Engineering, Project Management, Data Structures, Databases, Web Technologies
- Actively applying skills through real-world freelance and internship experience.

Moringa School — *Software Engineering Nanodegree*

November 2023 - July 2024

- Focused on full-stack web development, Agile practices, API design, and version control.
- Built several real-world projects and collaborated in team-based development environments.
